

and move it along the box.

I don't know how to do

It's okay! Have you heard of a unit cube?

A unit cube is a cube whose sides are each 1 unit long. You can use the chocolate as a unit cube.

How many chocolates can fit in the box?

Now that we've found how many chocolates

can fit along each side of the box, let's figure

out the total number of chocolates.

400

chocolates

Check

Correct! You may proceed to the next page.
